ABOUT US...

Our vision is to empower discerning meat buyers to know their farmer and know their food. We work directly with family-owned and operated farms to offer consumers the confidence that they're receiving high-quality, locally grown beef raised with strict standards. By purchasing from Upper Iowa Beef, our clients support Iowa, Wisconsin, and Minnesota farms and a processing system that generates minimal stress to the animal and leaves minimal impact on the environment.

KNOW YOUR FARMER

Upper Iowa Beef is about a community that came together because it believes we all have the right to know our farmers and know our food. Our farm families take pride in raising beef for your family!

KNOW YOUR FOOD

Upper Iowa Angus Beef is USDA Upper Choice and Prime Angus beef, handpicked from local farmers who meticulously care for their cattle and land to ensure premium quality beef for your customers.

COMMITMENT TO QUALITY

We purchase the best cattle in the world that are cared for with superior stockmanship and harvested at our state-of-the-art facility. The pride in ownership of our cattle suppliers combined with our professional workforce makes a difference in the finished product on your plate.

VERIFIABLE BLACK ANGUS GENETICS

Our management and procurement team works with some of the leading feedstock operations in the Angus industry to source the highest quality grade cattle to funnel into our production chain.

BRED, RAISED, AND FED IN THE USA

All cattle in our system have been born, raised, and fed in the USA. We source a high percentage of our cattle from their farm of birth, a statistic that is not common in today's mobile beef industry. We are blessed to work with smaller family farmers who provide a steady, yearly supply of genetically superior, high-quality cattle for our procurement needs.

HUMANE ANIMAL TREATMENT

Our cattle suppliers are all Beef Quality Assurance (BQA) certified. Our Quality Assurance team conducts daily and annual audits at our facility to ensure the humane handling of all animals.

HIGH-QUALITY FEED & SUSTAINABLE PRACTICES

The Tri-State region of Iowa, Minnesota, and Wisconsin provides some of the most ideal grazing lands for cattle herds to utilize. Adequate midwest rainfall allows 100% irritation-free forage and cropland fed to the cattle. Additionally, using crop residue and ethanol plant bi-products enables us to upgrade these low-value commodities into producing the high-quality Angus beef the consumer desires.

STATE-OF-THE-ART PROCESSING

Our newly constructed facility was professionally designed and built for efficient, quality beef processing where the attention to detail is evident. We have invested over \$30 million in the plant over the last four years. Our expansion in 2019-2020 has nearly tripled our production. Our team understands the value of investing in new technologies to improve processing, packaging, and delivery.
